The prices quoted are exclusive of shipping, packaging and any Transport insurance.
Cuts will not be delivered.

For technical data, please refer to the corresponding data sheets / catalogue pages of the individual products.
With the publication of this price overview all previous prices lose their validity.

For the installation cables (N)HXMH(St)-J there is an additional item copper surcharge listed on pricelist
Pos.CUPZ per cable type. All other cable products are not affected by the copper surcharge.

Calculation of the metal surcharge for copper cables:

Due to the high metal content in cables, they are sold at the daily price. The cable price is composed of
a fixed and a flexible price component.

The fixed portion includes the cost of manufacturing and all plastics used (non-metals).

The flexible portion consists of the daily copper price*, and will be taken into account respectively when invoicing.

*The basis is the daily fixed and published quotation of the LME (London Metal Exchange) in US dollars.

-> <https://www.lme.com/Metals/Non-ferrous/LME-Copper#Trading+day+summary>,
plus a cable manufacturer premium of currently \$160 per tonne of copper. Daily at 14:00
according to the current conversion rate of BFIX Frankfurt into Euro.

-> <https://www.bloomberg.com/markets/currencies/fx-fixings>.

In addition, the manufacturer adds a surcharge of one per cent to the purchase costs.
